Wespac Partners With Power-One on New Manufacturing Facility

Production in the 120,000 square-foot renovation will commence in October

Phoenix, Ariz. – Wespac Construction Inc. recently started renovation on the new 120,000 square-foot manufacturing and research facility for Calif.-based Power-One, Inc. Power-One, Inc. is a leading provider of renewable energy and energy-efficient power conversion and management solutions. Upon completion, the once vacant south Phoenix building will house production of inverters for solar and wind-energy power.

“Wespac is proud to be part of Power-One’s growth and expansion,” said John Largay, President of Wespac Construction. “We are excited to represent a company that not only aligns with our core values regarding sustainability but also one that will help stimulate the local economy.”

The facility is anticipated to support 350 new jobs in Arizona and throughout the United States. Power-One’s photovoltaic and wind inverters convert raw electricity to current that household appliances can use.

CB Richard Ellis’ Phoenix office brokered the deal; the Phoenix office of Smith Group is the architect.

ABOUT WESPAC CONSTRUCTION
